PRASAD GHOLE

Boston, MA | 580-736-8027 | prasad.ghole@gmail.com

FIRMWARE DEVELOPER

Bachelor of Engineering |Embedding Software | Product Design | Team Management

Development professional with over 11 years' experience in embedded system firmware development. Extensive experience in development, testing and implementation. Adept at providing process improvements to various roles through software development, aimed at facilitating organizational needs. Proficiency in development of medical instrumentation, fuel dispensers, industrial projects, lighting control and testing tools. Looking to bring a flexible, innovative and comprehensive approach to firmware development to a new challenge. Proven hard worker keen to demonstrate the ability to lead and deliver results.

- Designing and Development
- System Testing
- Requirement Capturing
- Embedded C
- Implementing User Interfaces
- Agile/Scrum
- Strong Coding Skills
- Written/Oral Communication
- Team Player

PROFESSIONAL EXPERIENCE

L&T TECHNOLOGY SERVICES LTD, India and US Locations 2009 – Present

***Firmware Developer**, 2009 – Present*

Served as a leading member of development projects using innovation to assist L&T Technology Service to stay on the cutting edge of technology and control. Including development of application, system and drivers along with support for hardware and development of system technologies and user interfaces. Travelled across the US.

Key Project Achievements:

On contract – Lutron Electronics *since April 2016*

- Development of DALI communication protocol module and STM32 based 100W driver.
- Enhancements to existing DALI to DMX gateway

On contract – Halliburton *September 2013 to March 2016*

- Responsible for the architecture, design, development and testing of an MSP430 controller based tool used to measure pressure, temperature and gamma during downhole operation.
- Responsible for leading offshore team for LabVIEW based PC application for configuring and manufacturing support.
- Responsible manufacturing and field testing support.
- Provided leadership to a team of 12 on a project to improve tools used for oil and gas exploration with focus on component obsolescence management.

On contract – Gilbarco Veeder Root Mumbai offshore development center *Nov 2009 to March 2013*

- Manifested a forecourt communication module for gas dispensers using STR7 Microcontroller along with various communication mechanisms for leading gas dispensers.
- Successfully integrated support for third party forecourt controllers.
- Responsible for tailoring gas dispenser firmware as per customer requirements.
- Responsible for providing field support

PANORAMA INFOCOMM LTD, Mumbai, India *2009 – 2009*

***Team Leader**, 2009 – 2009*

Lead a team to work towards high standards of development and software improvements for important medical equipment.

Key Achievements:

- Analyzed requirement and specification analysis for peristaltic pumps used in medical instruments.

PRASAD GHOLE

Boston, MA | 580-736-8027 | prasad.ghole@gmail.com

SOFTDEL SYSTEMS LTD, Mumbai, India *2007 – 2009*

***Software Engineer**, 2007 – 2009*

Worked in a fast paced development environment responsible for the key architecture of complex technology control to engender performance and improvements.

Key Achievements:

- Designed an innovating foundation fieldbus communication gateway for gas analyzer.
- Demonstration of the ability to embed HTML based web service interfaces for gas analyzers.
- Performed crucial reverse engineering of checkpoint smart RF tag detacher.

MAESTROES MEDILINE SYSTEMS LTD, Mumbai, India 2005 - 2007

***Senior R&D Engineer**, 2005 – 2007*

Developed improvements to medical equipment to facilitate faster medical processes for all service users.

Key Achievements:

- Leading developer of systems used to monitor patients with particular focus on, heart rate, ECG's, temperature parameter and display logging.
- Use of Nordiq RF module to develop communication drivers and fuel dispense display mimic systems.
- Enhancement to legacy devices and porting on silicon labs 8051.
- Responsible for porting Spo2 firmware from PIC to 8051 with enhanced user interface.

INTEGRATED AUTOMATION PVT. LTD, Mumbai, India *2005 – 2005*

***R&D Engineer**, 2005 – 2005*

Key member of the development team, demonstrating the ability to learn fast, tackle complicated challenges and deliver results of a high standard.

Key Achievements:

- Creation of 8051 based motor controller for speed profile generation.
- Gained a comprehensive understanding of the day to day environment of research and development.

EDUCATION & CREDENTIALS

M.S. in Embedded System under Work Integrated Learning Program, BITS, Pilani, India, 2013

Bachelor of Engineering (Electronics), Mumbai University, Mumbai, India, 2002

KEY SYSTEMS & TOOLS

- DALI
- MODBUS
- I2C
- SPI
- UART
- RS485
- Foundation Fieldbus
- NAND Flash
- RF communication
- JIRA
- GIT
- SVN
- Enovia PDM tools
- GoAhead Web Server
- Eclipse
- Code Composer Studio
- Gnu Compiler Collection
- IAR Embedded Workbench
- MPLAB
- CodeWarrior
- KEIL for ARM
